M4 explanation trust, HAM10000 test (n = 1,503, confirmatory). Frozen rule — EffNetV2 branch (local): not met, fused: not met
(a) Deletion (lower area is better)
probability of the predicted class
share of pixels removed
(b) Insertion (higher area is better)
probability of the predicted class
share of pixels restored
mean AUC deletion / insertion in brackets
ConvNeXt-T Grad-CAM (0.438/0.711)
Hybrid, EffNetV2 branch (local) (0.527/0.632)
Hybrid, fused (0.479/0.648)
random map (ConvNeXt-T) (0.516/0.653)
random map (hybrid) (0.555/0.601)
(c)
deletion − random (lower is better)
insertion − random (higher is better)
SSIM to randomised (lower is better)
stability (Spearman) (higher is better)
IoU (higher is better)
IoU gap (correct − wrong) (higher is better)
fused
EffNetV2 branch (local)
